CANDIDATE NAME: _____

HILL CRESCENT PVT SECONDARY SCHOOL

2022 MALAWI SCHOOL CERTIFICATE OF EDUCATION

MOCK 2 EXAMINATION

CHEMISTRY

Subject Number: M038/II

Thursday, 21 July , **2022**

Time allowed: 2hrs sessions

PAPER II

(40 Marks)

PRACTICAL

Instructions

1. This paper contains **5** printed pages. **Please check.**
2. There are four questions in this paper please check
3. Marks are indicated against each question.
4. This paper contains two sections A and B
5. Section A contains two descriptive questions on practical work to be answered in 1 hour.
6. In Section B there are two practical questions to be answered in 1 hour.
7. Write your **Name / Examination Number** on top of each answer sheet you have used.
8. In the table provided to the right of this page tick against the question you have answered.

Question Number	Tick if answered	Do not write in these columns

SECTION A (20 Marks)

1. With the aid of a well labelled diagram,explain the water cycle.

_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____(10 marks)

2. With an aid of a well labelled diagram describe how alcohol (ethanol) can be prepared locally using maize bran,sugar and yeast.

_____

_____(10 marks)

3. You are provided with an **aluminium sulphate, copper sulphate a**nd **iron (III) sulphate** labelled **A, B** and **C** but not necessarily in that order and dilute sodium hydroxide,test tubes and droppers.

a) Place 2 cm^3 of each solution provided in a separate test tube.

b) To each solution add 3 drops sodium hydroxide solution.Observe and record in the table below

c) Add 10 more drops of sodium hydroxide solution in each test tubes.Observe and record in the table of results.

SOLUTION	**Observation with 3 drops of NaOH**	**Observation with excess 10 drops of NaOH**
A		
B		
C		

(6 marks)

d) Identify the cations present in each solution

A: _____

B: _____

C : _____ **(3marks)**

e) Apart from using aqueous sodium hydroxide what other solution can be used for the identification of cations.

_____

_____

(1 mark)

4. You are provided with solutions **A, B** and **C** which are **an acid, base and a neutral** but not in

that order, phenolphthalein indicator, blue litmus paper, 3 test tubes, beaker, a dropper and distilled water.

a) Pour 2 cm^3 of solution A in the test tube and 2 drops of universal indicator and record the colour change in the table of results below.
b) Repeat step (a) for the remaining solutions B and C.
c) Rince the test tube with distilled water
d) Add 2cm^3 of solution A in a test tube and dip a litmus paper and record the colour change in the table.
e) Repeat step (d) with the remaining solutions B and C.

Table of Results

Solutions	Colour change with phenolphthalein indicator	Colour change with litmus paper
A		
B		
C		

(6 marks)

f) Identify the solutions

A: _____

B: _____

C: _____ (3 marks)

g) Define neutralization reaction

_____

_____ (1 mark)

END OF QUESTION PAPER
